#### Production Description

The TSBX8-NCCNC9C is an 8-Channel, Pluggable, Fiber-Optic OSFP for 800Gbps Ethernet Applications. It is a high performance module for data communication and interconnect applications which operate at 106.25Gbps per lane up to 500m on single mode fiber. The optical interface uses Dual MPO-12 APC receptacles.

This module is designed to operate over multimode fiber systems using a nominal wavelength of 850nm. The electrical interface uses a 60 contact edge type connector.

#### Absolute Maximum Rating

These values represent the damage threshold of the module. Stress in excess of any of the individual Absolute Maximum Ratings can cause immediate catastrophic damage to the module even if all other parameters are within Recommended Operating Conditions.
