WIFI Smart Temperature and Humidity Sensor

Description

The WIFI Temperature and Humidity Sensor is a device that communicates wirelessly via WIFI, enabling realtime data transmission to a backend server for remote monitoring. This sensor does not require additional wired network connections.

Features

- Supports modification of key sensor parameters and calibration of temperature and humidity data.
- Supports multi-user access, allowing users to view temperature and humidity data from all monitoring points.
- Supports historical data export.
- High measurement accuracy, wide measurement range, and good data consistency.
- Other language versions can be provided upon request.

Applications

With an IP55-rated waterproof and dustproof industrial design, this sensor is suitable for workshops, cold chain logistics, archives, shopping malls, laboratories, offices, data centers, warehouses, and other environments.

Specification

Item	Specification	
Power Supply	5V-12V DC	
Communication Method	WIFI	
Power Consumption	≤1W	
Temperature Range	-20°C to 80°C	
Recommended Operating Environment	5°C to 60°C and 20%RH to 80%RH for optimal measurement	
	performance	
Temperature Accuracy	±0.5°C	
Temperature Resolution	0.1°C	
Humidity Range	0-100%RH	
Humidity Accuracy	±5%RH	
Humidity Resolution	0.1%RH	
WIFI Standard	802.11 b/g/n WIFI @2.4 GHz	
Waterproof Rating	IP55	
Dimensions	36mm $ imes$ 64 mm $ imes$ 75 mm	

Monitoring Interface (PC Software)
