

UltraY HD 19" 1U Enclosure

4 x Module Cassette or 4 x Adapter Panel, Sliding Type

Description

The T&S UltraY 1U Rack Mount Fiber Enclosure (Sliding Enclosed Type) is engineered to accommodate up to four MPO/MTP® module cassettes or fiber adapter panels from the Ultra family, providing a versatile solution for various fiber optic patching and termination requirements. Its sliding tray enables convenient front access to fiber connections, making it well-suited for backbone cabling, distribution, and cross-connect applications.

When paired with MDC-MPO/MTP® or SN-MPO/MTP® module cassettes or adapter panels from the T&S Ultra family, the enclosure can support up to 256 fibers within a compact 1U space. A variety of front adapter port options are available.

The UltraY comes in two versions: Version A supports metal adapter panels and cassettes, while Version B supports plastic ones.

Features

- Durable and lightweight aluminum construction
- Smooth and stable sliding rails
- Textured black powder coat finish
- Universal 19" rack compatibility
- Removable top cover and front cabling bracket
