

UltraM HD 19" 4U Enclosure

To be loaded with Module Cassettes or Adapter Panels, Sliding Type

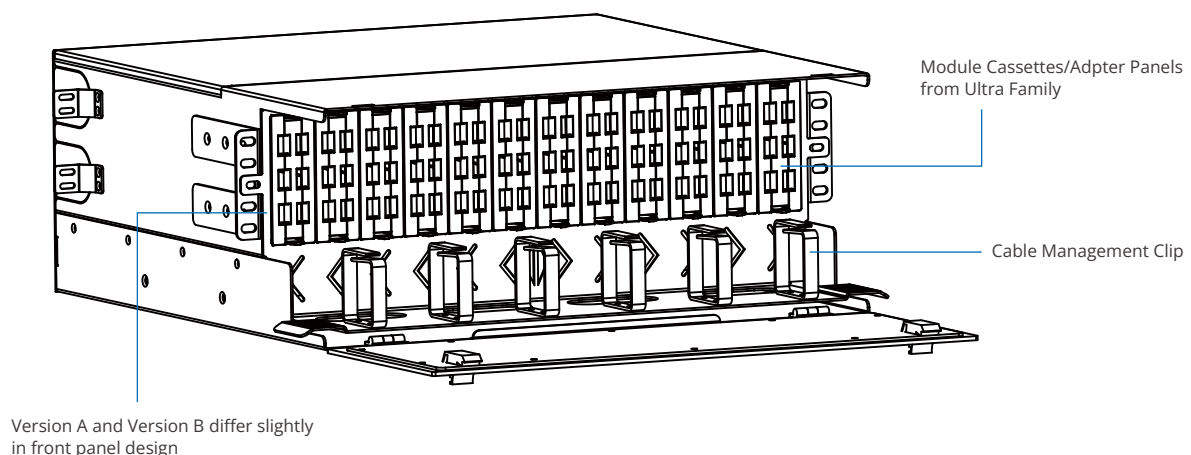

Description

The T&S UltraM 4U Rack Mount Fiber Enclosure (Sliding Enclosed Type) is engineered to accommodate up to 12 module cassettes or fiber adapter panels from the Ultra family, providing a versatile solution for various fiber optic patching and termination requirements. Its sliding tray enables convenient front access to fiber connections.

When paired with MDC-MPO/MTP® or SN-MPO/MTP® module cassettes or adapter panels from the Ultra family, the enclosure can support up to 768 fibers within a compact 4U space. A variety of front adapter port options are available.

The UltraM comes in two versions: Version A supports metal adapter panels and cassettes, while Version B supports plastic ones.

Features

- Durable and lightweight aluminum construction
- Smooth and stable sliding rails
- Textured black powder coat finish
- Universal 19" rack compatibility
- Designed for easy front cable management
