

# PSP PLC Splitter Fiber Optic Enclosure

## Description

PSP Series 1U Fiber Optic Enclosures are designed to host PLC splitters with higher port counts that exceed the capacity of the T&S PSB Series. Serving as a fully scalable extension to the PSB line, the PSP delivers ample space and flexibility for splitter units on standard 19" racks.

Featuring removable front adapter panels in a double-layer design, this series enables easy system upgrades and streamlined maintenance—significantly reducing installation and operational costs.

## Features

- Material: Cold-rolled steel & aluminum
- Universal 19" rack compatibility
- High-quality black electrostatic finish
- Dismountable & replaceable double-layer adapter panel

## Applications

- GPON
- LAN/SAN
- CATV networks
- FTTH

## Specifications

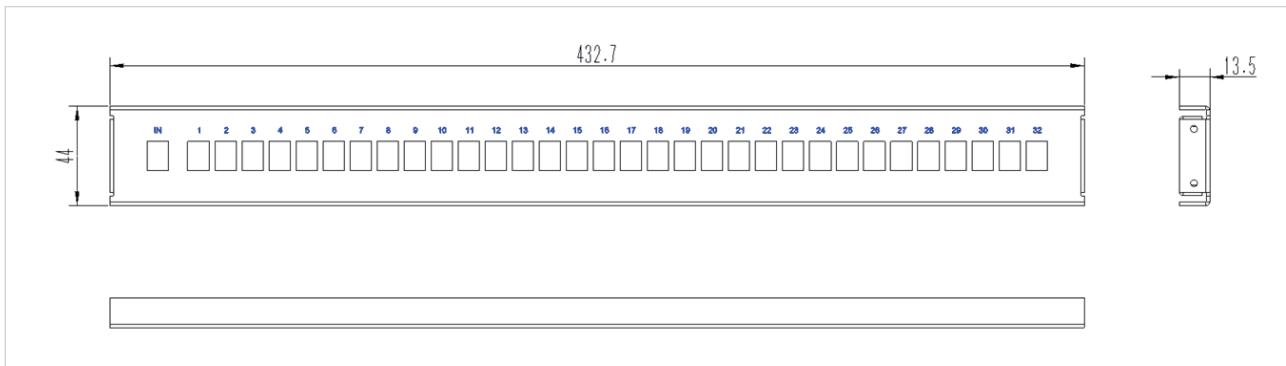

Items	Unit	Details
Height	U	1
Material	-	Metal
Installation	-	Rack-mount
Surface	-	Black Powder Coat Finish

Items	Unit	Details
Dimension (HWD) <sup>①</sup>	mm	44*483*200
Weight	kg	3.5 (Cold-rolled Sheet); 1.5 (Aluminum)

**Notes:**

① Depth: 315 mm (with front cabling rack mounted)

## Adapter Panel
